Little pots of sustainability

CERMER.COM

M

Welcome to Ceramics Welcome to CERMER

A warm welcome as warm as the materials we use. Every single atom has a purpose: to give the surface a most pleasant feel. Almost haptic poetry recited by the container. A poem in ceramics that creates a tremendous aesthetic effect.

Each CERMER container is an experience by itself, a way to communicate the authenticity & superior quality of your product.

CERMER Horeca Sustainable Tableware

Natural, inert, and non-polluting material

CERMER's ceramic food containers are made from natural, inert, and non-polluting clays that are easy to extract from open-cast quarries. Due to their inertness, ceramics do not pose a chemical or biological threat to natural sources like water and soil, nor to other living beings or plants.

Low Carbon Footprint

CERMER containers possess a low carbon footprint and are energy efficient as a result of being produced in Spain and fired at low temperatures (1060 degrees Celsius).

Top Quality Precision

At CERMER, we reinvent an ancient pottery tradition by positioning our ceramic containers as a high-added value option for the hospitality industry.

Oven, microwave and freezer-safe

From freezer to oven our ceramic ware is thermal shock resistant and can be washed repeatedly without losing its properties. They comply with the strictest EU and US health and safety regulations.

We provide a 100% natural reusable tableware solution

Thanks to the various options for use during their life cycle, our ceramic containers are long-lasting, helping to reduce the use of single-use products.

The ideal portion

CERMER containers are ideal portion control pieces, helping to control operational costs, reduce food waste and improve operational profitability

THE
MEDITERRANEAN
COLLECTION

Warm shades of terracotta
that pays tribute to
ceramic tradition.

THE MEDITERRANEAN COLLECTION
